

Changelog

Changes: v0.7 to v1.1

Major System Overhauls

- **Alignment System** replaces Party Level:
 - Old: Party Level was a shared group advancement costing 2,000+ gp
 - New: Alignment measures individual connection to concepts (magic school, combat style, faction, being). Count relevant Advancements and divide by 3.
 - Rationale: Creates more personalized character progression tied to actual play choices rather than gold accumulation.
- **Morale System** added (new major section):
 - Leadership: Party Leader gains Hearts equal to chosen Alignment Level; can absorb damage for companions
 - Hospitality: Sharing provisions restores 1 Heart per character; Host role with Comforts
 - Music: Bard role can restore Hearts via performance; Songs grant morale benefits
 - Animal Companions: Animals in Item Slots can restore 1 Heart per Muster
 - Rationale: Captures the Hobbit-inspired theme of fellowship and home-longing on the road.
- **Attempting the Extraordinary** (new section):
 - Unified mechanic for heroic feats, spells, and invocations
 - Pay Hearts equal to Level; maximum Level limited by relevant Alignment
 - Guide sets Oracle target based on situation
- **Death System** overhaul (new section):
 - At 0 Hearts, choose Offscreen or Onscreen death
 - Offscreen: Uncertain death; may return via Invocation at future Muster
 - Onscreen: One final heroic action, requires Sweet to succeed
 - Double Spicy (1,1) = immediate final death

Oracle and Resolution Changes

- **Sweet and Spicy** expanded:
 - Old: Sweet/Spicy added stylistic flair; Double 6s/1s gave bonus/penalty
 - New: Double Sweet/Spicy triggers extreme twists—ask the Oracle a question. Double Sweet can lead to learning Knacks (3 XP).
- **Insight categories** revised:
 - Old: TRAIT, ITEM, SKILL, NAME, ASSIST, EFFORT
 - New: TRAIT, SKILL, ITEM, BYNAME, FEAT, EFFORT
 - FEAT added: Advantage if you've overcome this foe/situation before in the game
 - ASSIST removed (streamlined)
- **Who Asks?** clarified: Players roll for direct character actions; Guide rolls for unestablished facts.
- **Area of Effect** rules added for dragonbreath, fireballs, etc.

Magic System Overhaul

- **Canting** added as 7th magic school (Thievery, Thieves' Cant)
- **Spell Casting** restructured:
 - Prerequisites: Requires Spellbook (or known spell); loud precise words

- Spell Level: Guide sets level; pay in Hearts; use Arcana Hearts first
- Roll for Control: Oracle determines if spell matches intention
- Caster Level: Alignment with magic school; +1 bonus for Skill in spellbook/Arcana
- **Magic Components** removed (simplified)
- **Arcana Hearts:** Magic-users gain 1 Arcana Heart per Arcana item at Muster (up to total Alignment)
- **Learning Spells:** Must cast with Sweet to be eligible; costs 3 XP
- **Spell lists** reformatted to d66 tables on dedicated pages

Invocations Overhaul

- **Making an Invocation:** Call True Name thrice, state request, lose d6 Hearts, ask Oracle if being responds
- **Shaping Spirits:** Invocations mold character toward being's ideal 'Saint'. Guide rolls on being's secret Trait table; must buy Trait for 3 XP if not already possessed.
- **Relics** expanded:
 - Ark: +1 Alignment bonus for Invocation
 - Saint: Can bless companions for extra Hearts on favored rumors

Experience System Overhaul

- **All advancements now cost 3 XP** (simplified from variable costs)
- **New advancement types:**
 - Byname: Name an item after significant deed (3 XP)
 - Songs and Recipes: Morale-boosting performances (3 XP each)
 - Arcana: Transfer known spell from spellbook to Arcana item (3 XP)
 - Relic: Memorialize Invocation connection in sacred object (3 XP)
 - Knack: Signature move learned through Double Sweet (3 XP)

Character and Equipment Changes

- **Magic Trait tax removed:** Magic school Traits no longer cost a Skill slot
- **Example Characters** updated with Songs in quotes format
- **Baggage** timing clarified: Dropping takes 1 Round (10 sec); accessing items takes 1 Turn (10 min)
- **Equipment Price Guide** added:
 - Common: 1 gp per slot
 - Armaments: 5 gp per slot
 - Niche: 10 gp per slot
 - Masterwork (+1): +100 gp; Grandmasterwork (+2): +1,000 gp

Combat Changes

- **At the Same Time:** If targeted by action, may respond simultaneously unless one has 'right of way'
- **Right of Way** rules:
 - Weapon attacks over everything else
 - Melee over missiles
 - Reach advantage when approaching; smaller weapon advantage in close quarters
- **Parry bonus** clarified: Reduce melee damage by 1 Heart if you melee attack or parry that foe this round

World Building Additions

- **Rumors spark table** added (d66 entries for generating adventure hooks)
- **Locations spark table** added (d66 entries for generating places)

- **Rumor Updates:** Guide updates each rumor at Muster; roll and combine if characters didn't act
- **Location Updates:** Roll and combine on visit to add detail

Structural Changes

- **Game Flow** section added with Turn Clock mechanics (glass bowl + dice)
- **Combat Rounds** defined as 10-second intervals
- **Camp Followers:** Non-mustered characters follow to set up camp
- **Sandbox Play** section moved to back of book as summary
- **Saving Throws** section removed (effects now use Oracle directly)

Changes: v0.5 to v0.7

- **Sweet and Spicy:** clarified intent that this is about 'style, not substance'.
 - Old: If any die rolls 6 the answer is more 'sweet', and if any die rolls 1 the answer is more 'spicy'. Never remove a 1 or 6 from the roll.
 - New: When any die rolls a 6, the outcome is 'Sweet,' adding a stylistic flair. Double 6s indicate a bonus or benefit. Conversely, if any die rolls a 1, the outcome is 'Spicy,' also adding style. Double 1s signify a penalty or complication.
 - Rationale: The original examples were about a guard sniped with 'sweet' leaving a spotless uniform. This is 'style'...there isn't extra damage or other guards dying as collateral. However, players have had a ton of fun with sweet and spicy, sometimes getting a bit carried away. The new wording attempts to create space for this (since it's fun), but also creates room for an appropriate cost.
- **Reframe Melee Combat** broad penalty as a more specific bonus.
 - Old: A character is 'in Melee' if they are within reach (~10 feet) of an enemy who is making a melee attack. The character has Disadvantage on all rolls unless they attempt an attack with a close combat weapon.
 - New: When two opponents attempt melee attacks against each other, reduce hits to each other by 1 Heart.
 - Rationale: This preserves the intention that characters in melee should do melee, not other kinds of actions, but reframes it as a bonus rather than a severe un-fun penalty.
- **Initiative:** minor edits to clarify intent.

Changes: v0.2 to v0.5

- Assets renamed to **Skills** (to avoid confusion).
- Magic Trait costs a Skill.
- **Party Level** system added: boosts Hearts, affects Oracle.
- Magic expanded: sentient items, Arcana usage rules, magic components.
- Named items can be used once per Muster for free.
- Movement rate quantified; accessing Baggage takes time.
- Songs grant morale Hearts (max 2 per character).

Changes: v0.1 to v0.2

- **Magic system** added: spell schools, spellbooks, Arcana.
- Magic-users defined by Traits; spells use Hearts.
- **Names mechanic** introduced: earn XP to name deeds, songs, items.
- Group music and comforts improve camp healing (up to $2d6 + 4$ Hearts).
- **Turn Clock** introduced to track time and spell durations.
